

Disabling & Deleting a Sub User in OLB

Disabling a Sub-User

Sub-User Administrators can disable another sub-user when access is no longer required due to job moves, leave of absence, promotion and so forth. Once a sub-user is disabled, he or she can no longer access or use the Focus Customer's account. Administrators can easily re-enable a sub-user at any time. Please follow the institution's policy on disabling sub-users.

To disable a sub-user, do the following.

1. On the Cash Management Drop-down Menu or Cash Management Page, click the **Administration** link.
2. On the Sub-User Administration page, click **Modify Sub-User Information** in the sub-user's **I want to** menu. The Modify Sub-User - User Information page appears.

Deleting a Sub-User

Sub-User Administrators can delete other sub-users. Because deleting a sub-user can affect pending commercial transactions, do not delete an access ID if only the sub-user information is changed (for example, if you have a new employee).

Simply modify the sub-user name, social security number, and email address, and set a temporary passcode with the new employee information.

NOTE: A sub-user's access ID cannot be reassigned once it has been deleted.

To delete a sub-user's information, do the following.

1. On the Cash Management menu page, click the **Sub-User Administration** link.
2. On the Sub-Users Administration page, click **Modify Sub-User Information** in the sub-user's **I want to** menu. The Modify Sub-User - User Information page appears.
3. On the Modify Sub-User - User Information page, click **Delete**.

A confirmation page with a list of dependent scheduled transactions appears.

- On the Confirmation page, if the sub-user has any scheduled transactions, they will appear on the page. When the Sub-user Administrator clicks the **Submit** button, the sub-user will be marked as deleted and all transactions involving the sub-user will be unscheduled. An in-session notification will be sent to the Focus Customer and the sub-user of the unscheduled transactions.

Delete Sub-User

Access ID: 54467 Name: test123

Are you sure you want to delete this sub-user Access ID?

Once an Access ID is deleted, it cannot be reused. Instead of deleting it, you can re-use this Access ID by modifying the sub-user profile.

Click the "Cancel" button below if you wish to cancel this request.

Dependent Transactions

There are no affected dependent transactions.

You have successfully deleted a Sub-User.
